PROFESSIONAL SUMMARY

Engineer-turned-Agile Coach and Delivery Lead with 11+ years in tech and 6+ years leading agile delivery across multi-team engineering programs. I coach Scrum Masters, Product Owners, and engineering leaders in distributed, multicultural environments, and run PI Planning, Scrum of Scrums, and continuous improvement in regulated, compliance-driven settings. Having started as a software engineer, I translate easily between engineering and business. CSM and SAFe Agilist 6.0 certified, with recent programs delivering 33% faster release cycles, 30% better sprint predictability, and 50% faster defect resolution.

PROFESSIONAL EXPERIENCE

Qorvo, Inc.

Zele, Belgium

Senior Scrum Master | Agile Delivery Lead - Semiconductor / IoT

August 2023 - June 2026

- Lead end-to-end delivery across 3 Agile teams (~25 practitioners) shipping Bluetooth, Zigbee, and Matter IoT firmware within a 50+ person Agile Release Train, coordinating dependencies across silicon, BLE module, and platform-stack teams.
- Cut release cycle from 3 weeks to 2 and lifted sprint predictability ~30% by introducing WIP limits, cross-team dependency tracking, and tighter PI Planning hand-offs.
- Drove a 40% improvement in customer issue response time and 50% faster defect resolution by building a flow-metrics and RAG reporting discipline that shifted leadership focus from output to outcomes.
- Delivered in a certification-driven, audit-heavy environment (Matter, Zigbee, security testing) by owning structured risk (ROAM) identification, mitigation, and escalation where governance and traceability are non-negotiable.
- Partnered with Product Management, Hardware Engineering, and senior leadership to turn strategy into executable plans, and with the PMO on quarterly capacity planning to keep commitments realistic and surface constraints early.
- Developed talent across the train by mentoring a senior engineer into a Product Owner role and coaching Scrum Masters, POs, and QA leads through RTE-led practice exchanges.
- Facilitated PI Planning, Scrum of Scrums, system demos, and inspect & adapt across distributed European and Asian sites, sustaining alignment across time zones and cultures.

Alcatel-Lucent Enterprise

Chennai, India

Technical Lead | Scrum Master - Network Management System

July 2019 - January 2022

- Cut defect resolution time ~50% on an escalation-heavy backlog by introducing sharper prioritisation, structured cross-team coordination, and active technical-debt management.
- Managed the full software delivery lifecycle for enterprise Device Management systems, bridging engineering, QA, and business stakeholders against committed roadmaps across release cycles.
- Resolved customer escalations and cross-team issues by bridging engineering, operations, and customer stakeholders.
- Advanced into a Team Lead role, coordinating work allocation and delivery commitments while mentoring engineers within agile teams.
- Facilitated agile ceremonies, sprint execution, and continuous improvement as part-time Scrum Master, becoming the team's go-to coach and mentoring peers on agile practices.
- Selected as 1 of 2 women globally across Alcatel-Lucent Enterprise for a fully funded Leadership Development programme at the University of Oxford (Saïd Business School).

- Developed and enhanced enterprise software systems using Java, Spring Framework, and RESTful APIs - built the technical foundation that later let me translate between engineering and business in coach roles.
- Built strong expertise in technical troubleshooting, API integrations, and system quality within a structured enterprise product environment.
- Drove code reviews and continuous improvement standards across development teams.

SKILLS

- **Agile Coaching & Delivery Leadership:** Agile coaching across multiple teams, Scrum, Kanban, SAgile, XP, Scrum of Scrums, PI Planning, end-to-end delivery, systemic transformation, servant leadership, continuous improvement
- **Coaching & Facilitation:** 1:1 and team coaching for Scrum Masters, POs, engineers, and leaders; psychological safety, conflict resolution, working agreements, remote-first facilitation, workshop design
- **Flow & Delivery Management:** WIP limits, throughput, cycle time, lead time, flow efficiency, aging, outcome-based KPIs, dependency management, milestone tracking, risk & issue management, RAG reporting
- **Scaled Delivery Frameworks:** SAgile (certified), Flight Levels concepts, Spotify-model squads / tribes / chapters / guilds
- **Engineering & Delivery Context:** CI/CD, DevOps, quality engineering, full SDLC, technical debt management, API-based integrations, product analytics
- **Systems & Lean Thinking:** Diagnosis of systemic impediments, value stream mapping, organisational change, lean approaches to improvement
- **Tools:** Jira, Confluence, Miro, Microsoft Teams, TestRail, X-Ray, Azure DevOps, ServiceNow, Visio

CERTIFICATIONS

- SAgile Agilist 6.0 - Scaled Agile (2023)
- Certified ScrumMaster (CSM) - Scrum Alliance (2021)
- #IAmRemarkable Global Facilitator – Rmrkblty.org (2023)

EDUCATION

- **Master in International Business** - IESEG School of Management, France (2023) | Triple-crown accredited
- **Master in Computer Engineering** - Vellore Institute of Technology, India (2014)
- **Bachelor in Computer Engineering** - Rajasthan Technical University, India (2012)

LEADERSHIP & INDUSTRY ENGAGEMENT

- **Oxford Women's Leadership Programme** - Saïd Business School; selected as 1 of 2 women globally across Alcatel-Lucent Enterprise (2021)
- **Conference Speaker** - European Microwave Week (EuMW 2025), Netherlands
- **Women in Tech Site Leader** - led D&I initiatives across Qorvo Belgium & Netherlands sites
- **Certified #IAmRemarkable Facilitator** - delivered 8 workshops, 45 participants, 4.7/5 average rating; focus on psychological safety, self-advocacy, leadership confidence
