🇧🇪 Belgian Permit valid until March, 2029

Delivery and programme professional with 10+ years across software engineering and agile delivery - most recently three years at Qorvo, coordinating software and hardware teams to ship IoT (smart home) products on quarterly release cycles. Engineer-turned-delivery-leader, with five years as a hands-on software developer before moving into delivery - and a track record of 33% faster release cycles, 30% fewer post-release defects, and programme reporting that holds up in senior stakeholder reviews. Comfortable in SAFe environments, managing dependencies across distributed multicultural teams, and translating between engineering and business when roadmaps and reality don't agree.

PROFESSIONAL EXPERIENCE

AUGUST 2023 - PRESENT

Qorvo Inc.
Zele, Belgium

SENIOR AGILE DELIVERY LEAD (SEMICONDUCTOR - IOT)

- Led agile delivery for cross-functional software teams building Smart Home and IoT products, working across distributed, multicultural teams with tight dependencies on hardware, firmware, and silicon timelines.
- Cut customer release cycles from 3 weeks to 2 - a 33% improvement - by mapping the end-to-end delivery flow, redesigning team handovers, and automating manual quality checks, so new product versions reached customers faster.
- Reduced post-release defects by ~30% within three months by establishing a shared definition of "done" and shifting quality checks earlier in development - freeing senior engineers from constant hotfix firefighting and protecting the next release.
- Designed a customer-issue triage process - with clear ownership, classification, and visible status tracking - that cut time-to-first-response by 40% and was later adopted by other product lines at Qorvo.
- Improved sprint predictability by ~30% by coaching teams on self-organisation and pragmatic Scrum practices, and by shielding them from mid-sprint disruptions and unplanned escalations so they could stay focused on customer commitments.
- Acted as the connective layer between Product Management, Hardware Engineering, and software delivery - turning roadmap constraints into executable plans and producing programme-level reporting (flow metrics, lead time, release readiness) used in senior stakeholder reviews and quarterly business decisions.
- Facilitated PI planning, system demos, retrospectives, and Inspect & Adapt sessions for the Agile Release Train, creating a psychologically safe space for conflict resolution, decision-making, and continuous improvement.

JULY 2019 - JANUARY 2022

Alcatel Lucent
Enterprise
Chennai, India

TECHNICAL LEAD | SCRUM MASTER (NETWORK MANAGEMENT SYSTEM)

- Delivered software for enterprise User and Device Management systems, coordinating engineering, QA, and business stakeholders to keep releases on cadence.
- Cut defect resolution time by ~50% through sharper prioritisation, tighter cross-team coordination, and cleaner escalation handling.
- Improved release predictability and quality by tightening dev-QA alignment, release readiness checks, and execution discipline across teams.
- Acted as the bridge between engineering and business stakeholders - turning technical blockers into clear decisions stakeholders could act on.
- Promoted to Team Lead - owning delivery commitments, allocating work, and mentoring engineers across agile teams.
- Took on Scrum Master responsibilities part-time, facilitating ceremonies and driving continuous improvement.
- Selected as 1 of 2 women globally for a fully funded Leadership Development Programme at the University of Oxford (Saïd Business School) - a company-wide scholarship recognising leadership impact.

JULY 2014 - JUNE 2019

Alcatel Lucent
Enterprise
Chennai, India

SOFTWARE ENGINEER (EARLY CAREER)

- Developed and enhanced enterprise software systems using Java, Spring Framework, and RESTful APIs, providing a deep technical foundation to understand complex architectural dependencies.
- Built strong expertise in technical troubleshooting, API-based integrations, and system quality within a structured enterprise product environment.
- Drove code reviews and continuous improvement standards across development teams.

EDUCATION

- **Master in International Business** - IESEG School of Management, France (2023) Triple-crown accredited
- **Master in Computer Engineering** - Vellore Institute of Technology, India (2014)
- **Bachelor in Computer Engineering** - Rajasthan Technical University, India (2012)

CERTIFICATIONS

- **SAFe Agilist 6.0**, Scaled Agile, 2023
- **Certified ScrumMaster (CSM)**, Scrum Alliance, 2021

SKILLS

- **Agile & Delivery Leadership:** Scrum, Kanban, SAFe, XP, Continuous improvement, servant leadership, End-to-End Delivery
- **Coaching & Facilitation:** Team coaching, Mentoring, Workshop facilitation, Cross-team collaboration, conflict resolution, psychological safety, stakeholder coaching and alignment
- **Delivery & Flow Management:** Delivery predictability, Dependency management, milestone tracking, risk management, release readiness, escalation management, impediment removal, metrics & KPIs (velocity tracking, lead time), PI planning, RAG status reporting, strategic prioritisation
- **Engineering Collaboration:** APIs, enterprise SW delivery, backlog refinement, Full SDLC, cross-team execution
- **Tools:** Jira, Confluence, Miro, TestRail, X-Ray, Azure DevOps, ServiceNow, Visio

LANGUAGES

English (C1) · Hindi (Native) · French (A1)

LEADERSHIP & INDUSTRY ENGAGEMENT

- **Oxford Women's Leadership Programme** - Saïd Business School, selected as 1 of 2 women globally across Alcatel-Lucent (2021)
- **Conference Speaker** - European Microwave Week (EuMW 2025), Netherlands.
- **Women in Tech Site Leader** - led Diversity & Inclusion initiatives across Qorvo Belgium & Netherlands sites.
- **Certified #IAmRemarkable Global Facilitator**, conducting workshops that foster psychologically safe environments, self-advocacy, and leadership confidence (8 workshops delivered, 45 participants, 4.7/5 average rating)
